

ERGOFERT ALGHE

ergofert

ORGANIC FERTILIZER - YEAST FLUID EXTRACT CONTAINING SEAWEED

1 L and 5 L flagon
10 L tanks

HOW IT WORKS

- **Increases the extension of the root system**
- **Combats soil fatigue**

ERGOFERT ALGHE, organic fertilizer of vegetal origin, contains seaweed extracts of *Ecklonia maxima* and *Ascophyllum nodosum*, plus yeast extracts.

These brown seaweed contain in their tissues a high amount of phytohormones, proteins, vitamins, polysaccharides, aminoacids, mineral salts. Moreover the yeast extracts provide amino acids, oligosaccharides, enzymes and ingredients useful to plant metabolism.

COMPOSITION:

Organic nitrogen (N) 1%, pH = 6.5, organic matter with nominal molecular weight <50 KDa minimum 30%, phytohormones of natural origin derived from *Ecklonia Maxima* and *Ascophyllum nodosum*, proteins, vitamins, polysaccharides, aminoacids, mineral salts, oligosaccharides, enzymes. Organic carbon (C) of biological origin = 10%. It also contains: enzymes (cellulase, protease, amylase, lipase), betaine, acid sugars, polycarboxylic acids.

ORGANIC COMPONENTS: plant extracts originating from agro-processing industry

CROPS	DOSAGE / HA	TIMING
Artichoke, tomato, eggplant, pepper, watermelon, cucumber, melon, courgette, celery, salad, parsley, etc.	Apply by soil or foliar at 2 L/ha	From transplanting up to harvest.
Grape, olive, kiwifruit, peach, cherry, apple, pear, apricot, etc.	Apply by soil or foliar at 2 L/ha	From vegetative regrowth up to veraison
Flowers and Ornamentals	Apply at 2 L/ha dosage by soil or foliar spray	From transplanting or vegetative regrowth

Authorized in Organic Agriculture as according to Commission Regulation (EC) n°889/2008
