## EC FERTILIZER Mixture of Microelements

1 L flagon  
5 L tank

### HOW IT WORKS

It is a fertilizer containing a mixture of microelements together with enzymes, ferments and natural mineral catalysts which:

- Nourishes the buds and prepares them for a vigorous and productive vegetative revival;
- Promotes the differentiation of gems;
- Increases resistance to cold.

The presence of enzymes, amino acids, proteins and organic carbon subjected to slow bio-processing guarantees a rapid and high cuticular and stomatal absorption as well as a rapid translocation into tissues. Nitrogen present in protein, peptide, amino acid form and urea, nourishes without causing imbalances.

### COMPOSITION

Zinc (Zn) soluble in water 5.5%; Boron (B) soluble in water 1.8%; Copper (Cu) soluble in water 1.3%; Iron HEDTA 0.2%.

CROPS	DOSAGE / HA	TIMING
All tree fruit crops (citrus, grape, kiwi, peach, cherry, apple, pear, apricot, etc.)	2 L / ha wetting fine branches and trunk	Before buds opening Repeat with the same dosage and modality to breakage of the buds
Olive tree	3 L / ha wetting leaves and trunk	Before the vegetative restart. Repeat with the same dosage and modality after 15-20 days

Authorized in Organic Agriculture as according to Commission Regulation (EC) n°889/2008
